

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A program storage device storing a computer program, the computer program for execution by a computer system having a processor and a memory, the computer program, the program storage device containing computer readable instructions, that when executed by the a computer system, performing the following act:
requesting a Web server to serve a Web document, the Web document including a plurality of objects that provide the ability to select one training course from a plurality of training courses, at least one of the plurality of training courses including a plurality of questions, a plurality of answers, and, in addition to the plurality of answers, a plurality of keywords that form a part of the answers;
wherein the at least one of the plurality of questions is answered by a student providing a student-provided-keyword; and
wherein a determination of whether the student correctly answered the at least one of the plurality of questions is determined at least in part by comparing the student-provided-keyword to at least one of the plurality of keywords.
2. (Original) The program storage device of claim 1, wherein the Web document includes an element that indicates that one of the plurality of training courses is available.
3. (Original) The program storage device of claim 2, wherein the element is an icon having the shape of an unlocked padlock.

4. (Original) The program storage device of claim 1, wherein the Web document includes an element that indicates that one of the plurality of training courses is unavailable.
5. (Original) The program storage device of claim 4, wherein the element is an icon having the shape of a locked padlock.
6. (Original) The program storage device of claim 1, wherein the Web document includes an element that indicates that one of the plurality of training courses was previously completed by a user.
7. (Original) The program storage device of claim 6, wherein the element is an icon having the shape of a check.
8. (Original) The program storage device of claim 1, wherein the Web document includes an element that identifies the title of at least one training course.
9. (Original) The program storage device of claim 8, wherein the element is one of the plurality of objects.
10. (Original) The program storage device of claim 1, wherein the Web document includes an element that identifies the number of questions in at least one training course.

11. (Original) The program storage device of claim 10, wherein the element is one of the plurality of objects.
12. (Original) The program storage device of claim 1, wherein at least one training course from the plurality of training courses includes at least one session and wherein the Web document includes an element that identifies the number of sessions in the at least one training course.
13. (Original) The program storage device of claim 12, wherein the element is one of the plurality of objects.
14. (Currently Amended) A program storage device storing a computer program, the computer program for execution by a computer system having a processor and a memory, the computer program, ~~the program storage device containing computer readable instructions, that~~ when executed by ~~the~~ a computer system, performing the following act:
generating an image on a computer display, the image including a plurality of objects that provide the ability to select one training course from a plurality of training courses, at least one of the plurality of training courses including a plurality of questions, a plurality of answers, and, in addition to the plurality of answers, a plurality of keywords that form a part of the answers;
wherein the at least one of the plurality of questions is answered by a student providing a student-provided-keyword; and

wherein a determination of whether the student correctly answered the at least one of the plurality of questions is determined at least in part by comparing the student-provided-keyword to at least one of the plurality of keywords.

15. (Original) The program storage device of claim 14, wherein the image includes an element that indicates that one of the plurality of training courses is available.
16. (Original) The program storage device of claim 15, wherein the element is an icon having the shape of an unlocked padlock.
17. (Original) The program storage device of claim 14, wherein the image includes an element that indicates that one of the plurality of training courses is unavailable.
18. (Original) The program storage device of claim 17, wherein the element is an icon having the shape of a locked padlock.
19. (Original) The program storage device of claim 14, wherein the image includes an element that indicates that one of the plurality of training courses was previously completed by a user.
20. (Original) The program storage device of claim 19, wherein the element is an icon having the shape of a check.

21. (Original) The program storage device of claim 14, wherein the image includes an element that identifies the title of at least one training course.
22. (Original) The program storage device of claim 21, wherein the element is one of the plurality of objects.
23. (Original) The program storage device of claim 14, wherein the image includes an element that identifies the number of questions in at least one training course.
24. (Original) The program storage device of claim 23, wherein the element is one of the plurality of objects.
25. (Original) The program storage device of claim 14, wherein at least one training course from the plurality of training courses includes at least one session and wherein the image includes an element that identifies the number of sessions in the at least one training course.
26. (Original) The program storage device of claim 25, wherein the element is one of the plurality of objects.
27. (Currently Amended) A program storage device storing a computer program, the computer program for execution by a computer system having a processor and a memory, the computer program, ~~the program storage device containing computer readable instructions, that~~ when executed by ~~the~~ a computer system, performing the following ~~act~~:

requesting a Web server to serve a Web document, the Web document including a plurality of objects that provide the ability to select one training session from a plurality of training sessions, which form a single training course, at least one of the plurality of training sessions including a plurality of questions, a plurality of answers, and, in addition to the plurality of answers, a plurality of keywords that form a part of the answers;

wherein the at least one of the plurality of questions is answered by a student providing a student-provided-keyword; and

wherein a determination of whether the student correctly answered the at least one of the plurality of questions is determined at least in part by comparing the student-provided-keyword to at least one of the plurality of keywords.

28. (Original) The program storage device of claim 27, wherein the Web document includes an element that indicates that one of the plurality of training sessions is available.

29. (Original) The program storage device of claim 28, wherein the element is an icon having the shape of an unlocked padlock.

30. (Original) The program storage device of claim 27, wherein the Web document includes an element that indicates that one of the plurality of training sessions is unavailable.

31. (Original) The program storage device of claim 30, wherein the element is an icon having the shape of a locked padlock.

32. (Original) The program storage device of claim 27, wherein the Web document includes an element that indicates that one of the plurality of training sessions was previously completed by a user.
33. (Original) The program storage device of claim 32, wherein the element is an icon having the shape of a check.
34. (Original) The program storage device of claim 27, wherein the Web document includes an element that identifies the title of at least one training session.
35. (Currently Amended) The program storage device of claim 34~~35~~, wherein the element is one of the plurality of objects.
36. (Original) The program storage device of claim 27, wherein the Web document includes an element that identifies the number of questions in at least one training course.
37. (Original) The program storage device of claim 27, wherein the at least one training session from the plurality of training sessions includes at least one part and wherein the Web document includes an element that identifies the number of parts in the at least one training session.
38. (Original) The program storage device of claim 27, wherein the at least one training session from the plurality of training sessions includes at least one training day and wherein the Web

document includes an element that identifies the number of training days in the at least one training session.

39. (Original) The program storage device of claim 38, wherein the Web document includes an element that identifies the number of training days completed in the at least one training session.
